FRIDAY, July 18—6 P. M.

The stock market is depressed to some extent. The het weather has without doubt some infinence in diluting prices. It is melting down almost everything clae, and we do not see why stocks should escape. There are other and more permasent causes at work, which we foreshadowed a few days since, and as these causes must be attributed the present depreciation in price. At the first board to-day Missourt 6's fell off † per cent; Illineis Central Bonds, ‡; Eric Bailroad, ‡; Michigan Southern Railroad, ‡; Panama, †; Illinois Central Railroad, ‡; Gieveland and Pittsburg Railroad, 1; Galena and Chicago, ‡; Milwaukie and Mississippi, ‡; Chicago and Rock Island, ‡. There was considerable activity at the decline, and more sellers than we have seen for a long time. Eric and Reading were sold in large lots, both for cash and on time. The sales of Michigan Southern were somewhat larger than usual. The burning of the steamboat Northern Indiana en Lake Eric is undoubtedly the cause of the large sales of stock and a portion of the decline. Illinois Railroad bonds are lower to-day, but the sales were not large. About two hundred shares of the stock sold at the first board, at a decline. We notice the sale of fifty shares Milwaukie and La Crosee Railroad stock, at the first board to-day, at 70

Crosse Railroad stock, at the first board to-day, at 70 per cent, buyer thirty days. This is the first public sale of this stock in this market. During the past month there have been a good many private specula-tions, and sales have frequently been made at 70 per cent, cash. The earnings of this company have been company ever realized in the Western States in the same length of time. The road was opened in January, 1856. In that month the earnings were of course very small, but every month since has shown an increase, so that the total receipts for the first six months, on only about fifty one miles of the road, were upwards of one hundred and eighty thou-sand dollars. In July—the present month—the earnings are likely to be larger than in June, and it is estimated that the total receipts for the year ending December 31, 1856, will range between five and only about one and a half million of dollars, is most extraordinary. Calculating one-half of the earnings for operating expenses and we have say \$250,000 to pay interest on \$500,000 of debt and dividends on \$1,000,000 of stock. This would be equal to twenty per cent the first year, on a short and unfinished road. Such a stock should sell for more than seventy

At the second board the market was better. Erie At the second board the market was bester. Eneadvanced \( \frac{1}{2}\) per cent; New York Central, \( \frac{1}{2}\); Reading,
\( \frac{4}{2}\). After the board prices advanced another fraction, but the improvement was partially lost before
the close. There was a decided apward movement
in Reading, with large sales.

Up to the close of business to-day the engagements of specie for shipment by the stea mahip Baltic, from this port for Liverpool to-morrow, (Saturday), amounted to \$500,000, of which \$100,000 was
sliver. The above aggregate will probably be in-

silver. The above aggregate will probably be in-

The Illinois Central Railroad Company are about issuing certificates or scrip for \$300,000, in sums of \$500 and \$1,000, bearing interest at the rate of 7 per cent per annum, the principal redeemable on the 15th of January, 1858. These certificates are issued in anticipation of the amount to be received for 30,000 shares of stock, which are now represented by optional rights or privileges, which will expire on the 1st of January, 1858. The amount due at that time on this stock is pledged for the redemp-on of this issue of certificates.

The Assistant Treasurer reports to-day as fol-OW8:-

The Beekman Fire Insurance Company have declared a semi-annual dividend of eight per cent.

The New York Central Railroad a semi-annua,

dividend of four per cent, payable on the 20th of

clared a semi-annual dividend of eight per cent. By the last mails from Aspinwall the Chiriqui Improvement Company have received most en-couraging advices from their agent and engineers sent out to examine and report upon their property; the great number of coal beds to examine being spread over a large extent of country, require siderable time, but enough is known now by their recent examinations to place it beyond a doubt that good working coal beds exist upon the comreny's possessions. The coal formation is not of as old a date as that of the United States; but this was expected to be the case in a volcanic country. The want of age in the formation is commated fully by the volcanic action—this is exnola is reported by Professor Manross to be of a superior quality, heavier, brighter and more compact than the beds which are near the edge of the sea, and which have, from exposure, lost much of their strength the volcanic action nearer the Cordillers range having been greater, and consequently more effective upon the coal measures; the vein near the Lagoon vary in thickness, some of them being five and six feet, but the coal there is light and brittle, and though easily mined is not equal to that of Chanquinola. The official information received is very condensed and brief, but establi certain points which show beyond question that the company possesses good workable coal mines The locality at which the works will be fixed is of course not yet determined, as many more beds have yet to be examined; but Professor Manross inclines more to the Chanquinois coal than the other, and will probably recommend that point as the best, unless he should find other beds, of equally good quality, in a location which should suit him better. This Chanquinola coal is the first which was discovered by Mr. Morel, some years since, and it has always been the favorite point with the projectors of this enterprise for establishing the The Chanquinola is double the size, nearly, of the Chagres river, and this bed of coal is about three-quarters of a mile from the river, and as far as examined shows about fifteen feet of thick ness, thirteen feet of which is pure coal. Coal could be brought down to the shipping point in a few hours, as soon as the arrangements of the com-pany shall be completed. The fine timber of thi river will thus be made serviceable at the ship ping point, and the flat wate to bring down the coal can be constructed as they are in some parts of the Western country, where they are used afterwards for lumber. Of course no positive line of action can be adopted until the full examination of all the points is made; these first reports, nowever, settle the main question, and establish the fact bebe mined at a very low price. As we know the great interest which this enterprise has for the commercial world we have merely adverted to the facts briefly. We shall keep the public advised. So seen as more circumstantial reports shall be received from the engineers we have no doubt the directors will lay them in extense before the commu-

The samexed statement exhibits the quantity and walue of foreign dry goods entered at this port for gonsumption, for warehouse, and also the withdraw-

als from warehouse, during the week ending and in-cluding Thursday, July 17, 1856:— Falus. \$924,149 657'568 1,488,060 245,934 206,776 | Manufactures of wool 2,770 | 2,770 | Do. cotton 3,581 | Do. silk 1,575 | Do. Value put on the market during the week....\$3,723,966

The inactivity usual at this season of the year, noticed in our last, still continues. The importations noticed in our last, still continues. The importations
till continue large, and the stocks now held by
obbers are large and very complete in the variety
of assortments. The hotels contain a large number
of country merchants, but owing to the excessive
heat of the weather many of them pass on to cooler
retreats to the North and Eastward, deferring to
make purchases until their return from the watering the most employed in getting in stocks and in making more or less sales to dealers from the distant trade of the West and South. Accounts from Wisconsin and other grain growing Western States represent times to be hard and money scarce. In many of the towns discounts on loans ranged from 2½ a 3 per cent a month. The consequences are that a good many failures have been reported in that direction. The country at large, however, is properous, and the crops of grain, cotton, &c., with some exceptions, are quite promising. The character of the wheat, as a general thing, will prove of a superior quality. In Virginia and other Southern States the crop has been gathered, and is selling in this market at \$1.67 for red and \$1.70 for fair white States the crop has been gathered, and is selling in this market at \$1 67 for red, and \$1 70 for fair white. The harvest is in rapid progress in the middle States, and the berries are ripening fast in the Genessee Valley, and promise this year to be saved in good condition. It is probable that this season we shall have more good flour, and less inferior or common, than we had last year, and less speculation; and the dry goods trade with the West promises to be more healthy for the future, if not so large. Reports from Manchester, by the Niagara, represent an improved trade at firmer prices. represent an improved trade at firmer prices. There is a prospect that staple goods may rule higher during the fall trade. Be this as it may, no one anticipates that they are to be any lower. The jobbers chiefly engaged in the Southern trade are in the expectation of a heavy business from that direction. The supply of cotton from the last crop direction. The supply of cotton from the last crop was the largest in the history of the country, and realized good prices. The effect has been to make money plentier at the South, but it has also enhanced the prices of improved lands and labor to such an extent as to render the profits from newly established plantations much less. The capacity or ability of the people to consume goods, however, has been greatly advanced. This trade is becoming more divided in this direction. It is more the cusmore divided in this direction. It is more the cus tom for New York jobbing houses to establish branches in Charleston, Savannah and New Or-leans, as was done by Pariah, Halbrook & Co., who succeeded in making fortunes. It generally re-quires a much larger capital to do business with the South, because it is customary to give six or twelve months' credit, and sometimes a longer period, while with the Work and Northwest the business is with the West and Northwest the business is more distributed and the paper of shorter dates given in payment for goods. Since the news has reached here of the settlement of difficulties be-tween Spain and Mexico the demand for cotton goods for export to the latter has been revived, and the chief shipments of the past week have been made to Tampico and Vera Cruz. The next been made to Tampico and Vera Cruz. The next largest shipments have been made to China. The exports for the week ending the 12th July amounted to 816 packages, valued at \$49,028. The total num-ber of packages since the first of January have been 24,273 against 18,857 for the same time last year. Boston, since the first of January, has shipped the past year. Heavy brown shirtings and sheetings rule at 8c., and light standards at 7c. a 7 jc. Bleached were dull. Drills were firmly held at 8c. Other descriptions of domestic goods were without change of moment in prices. Prints are in abus dant supply and in great variety of styles or patterns

Provisions.—Pork—The market was rather quiet, and prices steady. Sales of about 350 bbis, were made, in loss, at \$20 62½ for mess. Prime was at \$17 62½. Beef was steady, with sales of about 100 bbis, including country prime, at \$7 50 a \$8 25, and mess at \$8 50 a \$10. Other descriptions were unchanged. Cut meats were firm, and sales of dry saited shoulders were made at 9½c. a 9½c. for shoulders, and 10½c. a 10½c. for hams. Bacon was firm. Lard continued firm, with small sales at 12½c. a 12½c. Butter and cheese were unaltered in prices.

Rice.—Sales of 75 casks were made at 3½c. a 4½c. Spices.—A cargoof 1,790 bags pimento were sold by auction to day at 10-16c. a 10-56c, three months.

Schars.—The market was steacy, with sales of 600 bbds. michuding 300 Porto Rico, at 9½c.—the romainder was Cuba, which ranged from 8c. a 9c.

Spiners.—The market in sortite is quiet, with small sales to the trade. We can only note sales of 25 half pipes Cognac brandy at \$4 50 a \$5; 15 do. Rochelle brandy at \$5 25 a \$5 75. 20 puncheous Jamaica rum at \$1 b0, and 15 pipes gin at \$1 15.

Tallow.—The market has exhibited within the few days past more animation, and some 50,000 lbs. have been sold on speculation.

Totacco.—There is more inquiry for Kentucky, and holders are very firm. Sales of 186 hbds. Kentucky at 10-5c. at 15 slose Havana at 25c. a 30c.; 260 bales Yara at private terms, and 140 cares seedleaf at 6½c. a 18c.

Whiskey was heavy, with small sales of Ohio and

Yara at private terms, and 140 cases seedleaf at 6%c. a 18c.
WHISKEY was heavy, with small sales of Ohio and prison at 40c.
WHISE are in moderate request. Sales of 150 quarter casks port at \$2 10 a \$2 50; 250 do. sweet Managa at 95c.; 25 do. dry Malaga at 85c.; 1,000 cases claret at \$2 55 a \$2 75, and 400 quarter casks Burgundy p rt on speculation, at private terms.

WOOL.—During the past week there has been a better demand for domestic, and sales are reported of 50,000 lbs. at our quotations. Foreign continues very quiet, and, owing to the high prices it costs to import it at present, he ders are not over anxious to make any concessions in price, and thus not meeting the views of purchasers, we have no sales of importance to report.

FAMILY MARKETING.
RETAIL PRICE OF PRODUCE IN WASHINGTON MARKET.
The very warm weather affected sales not a little in Washington market yesterday. The butchers cleared out early, there being no purchasers. Meat still continues high, with light sales. The same remark applies to poultry. Fish is dear; salmon is getting cheaper, so are herring. Oysters do not sell well, owing to the impression abroad that they are not good this time of the year. Soft

crabs are in. Fruit is very abundant, especially berries. Strawberries and cherries have run cut, but their place is supplied by other fruit. Grapes promise to be abundant but not very good. Apples and pears also are very poor and dear; they should not be eaten for a month at least. There are no peaches in market yet, and dealers say there will be very lew this acason.

Vegetables are tolerably cheap. Old potatoes have run out and so have Burmudas. The new once are very good and command from \$2.50 to \$3 per parrel. New cabbage is coming in. Tomatoes fluctuate in price very much. They were \$4 per bushel yesterday, and may be dollar to-day. Butter has cheapened three cents per pound.

The following table shows the price of each article:—

## EMPIRE WATER.

JUSTICE TO THE EMPIRE SPRING, SARATOGA.

TO SOUTHERN DRINKERS OF SARATOGA WATER.

The steady increase of popularity of the Empire water during the past few years, the CERTIFICATES OF PRESICIANS, which prove it SUPERIOR TO CONGRESS in very many essential particulars, possessing all the virtues of the Congress, without the irritating properties which, in that water, often create a cough in the drinking by invalide, the Empire water having in it a fine proportion of lodine, which makes it useful in many phases of sentences biseases, pyspersia, etc.. and invaluable in the awatening to action of the torpid liver, guarding effectually against CONSUMPTION, for which, previously, Saratoga waters have been mainly held as inefficient, have produced a strong impression in the public mind that the Empire is desidined very soon to be the ROST CELEBRATED OF THE SARATOGA WATERS.

This fact has induced certain interested parties to make the following misrepresentiation:

They state in their advertisement that there are a multitude of springs at Saratoga, the water from any of which might be add as Saratoga water, by persons whose scruples of conscience extend only to cases where they are liable to pecuniary qualishment, and yet the article so imposed on the public be worthless, or injurious.

punisament, and yet the article to imposed on the public of worthiess, or injurious.

THE AROYERXTRACT

contains a positive declaration that all the waters at Saratoga, except the Congress, are worthless, or injurious.

All the mineral waters at Saratoga have their peculiar medicinal properties, and are neither worthless nor injurious; but only the Empire Water and the Congress are bottled to any extent for exportation.

and its unequalled waters, we refer to analysis, experience, and medical authority, to prove to Southern patrons and the public, its SUPERIORITY.

The analysis of the Empire water, by Professor E. Emmons.

C	as follows:- bloride of sodium										269.66
	icarbonate of lime									53	41.8
	carbonate magnesia.									ð.	H11.5
Ĥ	veltiodate of soda or i	odin	 	 		 	 8	.,		.,	12.0
Ľ	carbonate of iron, a	Trace	***	 	**	 			* *	• •	O

Schie contents in a gainor specific gravity. Specific gravity. From the results of several experiments. I have made with the water of the Empire Spring, and also from the published analysis of Prof. E. Emmons, I and it to contain the same entire ingredients as are contained in the Congress and other baratoga waters, but in different proportions. The amount of combined todine is unusually large.

For the treatment of scrotlia, some stages of consumption, and kindred affections, I do not know of any mineral water better adapted for producing salutary results. The water contains so small a proportion of from as to enable it to be bottled for transportation very advantageously.

NEW YORK, June 23, 1831.

CHILTON, M. D., Chemist.

THE EMPIRE WATER

May be found at the principal drug stores, hotels, and at G. W. WESTON & CO. S. Saratoga Springs, or at their Southern report 66 Barciay street, New York.

SALES AT AUUTTUS

100 LOTS AT NORTH WAVERLEY, PALISADE NATURE OF A STATE OF THE STOTE, Auctioneer, will sell, at public auction, on Tuesday, July 27, at 20 clock F. M., on the ground, The property fronts 1600 feet on Palisade avenue, and is one mile from the Hobken ferry, and one and a half miles to the Jersey (ity ferry. The view is grand and caunot be intercepted, overlooking, the Highlands of Nevestus, and is 125 feet above high water. First class improvements are going up adjoining the property on the north south and west. The Fassaic water will be introduced as soon as demanded, the main pipe now passes within 500 feet of the property. The Hudson City Gas Company was incorporated last winter, and gas will be supplied as soon as desired. All persons desirons of purchasing lots on Bergen Heights are requested to visit this property, and see the superior advantages it has over any surrounding process the day of sale; to per cent on the 22d day of Source's fee, on full warrantee deeds will be given; the balance (Source, when on the day of sale; to per cent on the 22d day of Source's fee, on full warrantee deeds will be given; the balance (Source, when you can remain on bond and mortysage for five years, at 7 per cent at entendance at the Jersey City and Hoboken ferries on the day of sale; to convey persons to and from the ground free of expense. For maps and further particulars inquire of the auctioneer, at his office, 75 Montgomery street, Jersey City; or of THOMAS WELLWOOD, 78 Nassau street. New York.

A NTHONY J. BLEECKER, AUCTIONEER.—ANTHONY J. Bleecker & Co. will sell at public auction, at the Merchants' Exchange, in the city of New York, on Mouday, the last day of September next, at 12½ of clock, \$420,000 eight per centifiest morigage bonds of the Milwaukle and Horicon Railroad Company.

time within five years from their date, with interest of eight per cent, payable semi-annually on presentation of the coupons annexed, at the Bank of the Republic, in the city of New York.

They are secured by a mortgage upon, and are a first lien upon forty-two miles of the road between its function with the La Crosse and Milwaukie Railroad, in the village of Horicen, in the county of Bodge, and the village of Beelin, in the county of Marquette, together with all the rolling stock, depot grounds, and all other property of the company, and by a sinking fund sufficient to extinguish the whole mortgage debt of the company before the maturity of the bonds.

Should there be a failure on the part of the company, or neglect for make the annual deposit to the sinking fund as specified, the trustee, Robert H. Lowry, Esq., Cashier of the Bank of the Republic, in the city of New York, is authorized and directed to for close the mortgage in same manner as if default was made in the payment of principal or interest on said bother thus putting it out of the power of the company to the subligation of the company to the subligation of the power of the company to the subligation of the power of the company to the subligation of the power of the company to the subligation, and putting it out of the power of Waupun, fifteen miles from its junction with the La Crosse and Milwaukie, and has been in operation since the 20th of February last, and its os situated, geographically, that it will always be without coupetition, as no other road can be constructed to compete for the business that is justly tributary to it without being mach more circuitous and distant, besides being much more creatly in construction. The fifteen miles of road have earned, in the three months ending May 26, over \$12.400, which is a much larger amount, in proportion to its length, than was earned by the Milwaukie and Mississippi Railroad in the corresponding months in the year 1884, the first year that road was opened to Madison, and this known was much less
